SUMMARY

Product Engineer who designs and ships software systems from concept to deployment. Experienced in full-stack development, systems architecture, and product design for e-commerce, SaaS, and adaptive learning platforms.

- **Architecture & Product:** End-to-end systems design, requirements engineering, rapid prototyping, database design, and UX architecture.
- **Engineering:** Full-stack development with React, Next.js, Node.js, TypeScript, PostgreSQL, and REST APIs with automated testing.
- **AI & Data:** Machine learning models, adaptive algorithms, data modeling, and knowledge graphs applied to real products.

SKILLS

Product & Systems: Systems Design, Requirements Engineering, UX Design, Agile Development, Rapid Prototyping, Database Design, API Integration, SaaS Architecture, Information Architecture, Product Lifecycle, Responsive Design
Full-Stack: TypeScript, JavaScript, Python, React, Next.js, Node.js, REST APIs, JWT, OAuth, Tailwind CSS
Database & Backend: PostgreSQL, Supabase, SQLite, Data Modeling, Schema Design
AI & Data: Machine Learning, Bayesian Inference, Adaptive Algorithms, Knowledge Graphs, Spaced-Repetition Systems
Testing & DevOps: Playwright, Vitest, Sentry, CI/CD, Git, GitHub, Vercel, Postman, Figma

PROJECTS

Possah — *Production e-commerce for a live apparel brand*
Next.js · TypeScript · Supabase/Postgres · Razorpay · Sentry · Playwright · Vitest thepossah.com

- Architected and deployed a production e-commerce platform — storefront, admin dashboard, payment processing, order management, and fulfillment workflows.
- Integrated Razorpay payment gateway, JWT authentication, and Sentry error monitoring to ensure reliability and real-time error tracking.
- Built automated E2E and unit testing suites using Playwright and Vitest, enabling confident production deployments.

Synaptic — *Adaptive learning engine that personalizes what you study next*
Next.js · TypeScript · SQLite · React Flow · JWT synaptic-adaptive-learning.vercel.app

- Designed an adaptive learning engine using Bayesian Knowledge Tracing, spaced-repetition scheduling, and prerequisite graph traversal to personalize study pathways.
- Developed interactive knowledge dependency visualizations with React Flow to help learners understand progression requirements.
- Modeled learner progression and data relationships using custom data modeling and knowledge graph structures.

Blueprint Builder — *Turns messy client requirements into structured specifications*
Next.js 14 · TypeScript · Supabase/Postgres · Tailwind · Vercel web-builder-1-six.vercel.app

- Built a structured requirement discovery system that transforms client goals and business needs into implementation-ready website specifications.
- Standardized information collection and project handoff, reducing planning ambiguity and accelerating developer onboarding.

Fitness Garage & Zingara — *Took two local businesses online*
HTML · CSS · JavaScript fitness-garage.in · zingararestaurant.co.in

- Designed and launched official websites for 2 operating local businesses, translating operational requirements into customer-facing digital experiences now serving as their primary online presence.
- Structured information architecture, service presentation, inquiry flows, and conversion-focused UX in direct collaboration with business stakeholders.

EXPERIENCE

Operations Team Lead — E-Cell, UVCE, Bengaluru, IN Sep 2023 – May 2025

- Coordinated logistics, execution, outreach, and cross-functional teams for entrepreneurship-focused events and innovation challenges.
- Drove 200+ participants to a case competition through structured planning and a focused content strategy.

Web Design & Content — Greek God Clothing, Bengaluru, IN Jan 2025 – Apr 2025

- Led end-to-end product lifecycle for the brand's first online store — from concept and Figma prototyping to live deployment; shaped the content calendar around product launches.

Marketing Intern — Jobert Apparels Pvt Ltd, Bengaluru, IN Apr 2025 – Oct 2025

- Developed 3 new sub-brand identities from scratch — names, logos, slogans tailored to target audiences — and established the brand's complete customer-facing communication channels.

EDUCATION

University of Visvesvaraya College of Engineering (UVCE) — Bengaluru, Karnataka Expected 2027
B.Tech, Artificial Intelligence & Machine Learning · CGPA 8.9 / 10
Coursework: Data Structures & Algorithms, Software Engineering, DBMS, OOP, Machine Learning, Computer Networks

Base PU College — Bengaluru, Karnataka 2021 – 2023
Pre-University (PCMC) · 92%

Jaigopal Garodia Rashtrotthana Vidya Kendra — Bengaluru, Karnataka 2021
Secondary School Certificate (Class X) · 94%
