SUMMARY

Software engineering student who ships production systems end to end. Built and deployed a live e-commerce platform handling real payments, an adaptive learning engine driven by Bayesian Knowledge Tracing, and sites serving as the online presence for two operating businesses. Works across React, Next.js, TypeScript, Node.js, and PostgreSQL — from requirements and system design through automated testing, CI/CD, and production monitoring.

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, Python, SQL, HTML, CSS
Frontend: React, Next.js, Tailwind CSS, Responsive Design
Backend: Node.js, REST APIs, JWT, OAuth, Payment Gateway Integration
Databases: PostgreSQL, Supabase, SQLite, Data Modeling, Schema Design
Cloud, DevOps & Testing: Vercel, CI/CD, Sentry, Git, GitHub, Playwright (E2E), Vitest (unit)
AI/ML: Machine Learning, Bayesian Inference, Adaptive Algorithms, Knowledge Graphs
Practices: System Design, Requirements Engineering, Agile Development, UX Design, Figma

PROJECTS

Possah — Production e-commerce platform for a live apparel brand thepossah.com
Next.js · TypeScript · Supabase/PostgreSQL · Razorpay · Sentry · Playwright · Vitest

- Architected and deployed a full-stack storefront, admin dashboard, payment processing, order management, and fulfillment workflows, giving the brand a complete end-to-end e-commerce system in production.
- Integrated the Razorpay payment gateway, JWT authentication, and Sentry monitoring to handle live transactions, secure authenticated access, and surface production errors in real time.
- Wrote Playwright end-to-end and Vitest unit suites covering checkout, auth, and order flows, catching regressions before release and enabling confident deployments.

Synaptic — Adaptive learning engine that personalizes what you study next synaptic-adaptive-learning.vercel.app
Next.js · TypeScript · SQLite · React Flow · JWT

- Engineered personalized study pathways using Bayesian Knowledge Tracing, spaced-repetition scheduling, and prerequisite-graph traversal to select each learner's next topic.
- Built interactive React Flow knowledge maps that visualize topic dependencies, and modeled learner progression with custom knowledge-graph data structures.

Fitness Garage & Zingara — Took two local businesses online fitness-garage.in · zingararestaurant.co.in
HTML · CSS · JavaScript

- Designed and launched customer-facing websites for two operating businesses, now serving as their primary online presence.
- Structured information architecture, service presentation, inquiry flows, and conversion-focused UX in direct collaboration with business stakeholders.

EXPERIENCE

Marketing Intern | Jobert Apparels Pvt. Ltd., Bengaluru, IN **Apr 2025 – Oct 2025**

- Created three sub-brand identities from scratch — names, logos, slogans, and audience-specific messaging — and established their customer-facing communication channels.

Operations Team Lead | E-Cell, UVCE, Bengaluru, IN **Sep 2023 – May 2025**

- Coordinated logistics, outreach, and cross-functional execution for entrepreneurship events and innovation challenges.
- Drove 200+ participants to a case competition through structured planning and a focused content strategy.

Web Design & Content | Greek God Clothing, Bengaluru, IN **Jan 2025 – Apr 2025**

- Delivered the brand's first online store end to end — requirements and Figma prototype through live deployment — and aligned launch content with the product calendar.

EDUCATION

University of Visvesvaraya College of Engineering (UVCE) | Bengaluru, Karnataka **Expected 2027**
B.Tech, Artificial Intelligence & Machine Learning · CGPA 8.9 / 10
Coursework: Data Structures & Algorithms, Software Engineering, DBMS, OOP, Machine Learning, Computer Networks

Base PU College | Bengaluru, Karnataka **2021 – 2023**
Pre-University, PCMC (Physics, Chemistry, Mathematics, Computer Science) · 92%

Jaigopal Garodia Rashtrotthana Vidya Kendra | Bengaluru, Karnataka **2021**
Secondary School Certificate, Class X · 94%
