SUMMARY

Product Engineer with hands-on experience designing and shipping production-grade software from concept to deployment. Proficient in full-stack development (Java, TypeScript, Node.js, React, Next.js), relational database design (PostgreSQL, SQLite), and core CS fundamentals — algorithms, data structures, OOP, distributed systems, and OS concepts. Experienced across the full SDLC in cross-functional teams, with a track record of building scalable systems, integrating payment gateways, and shipping reliable software with automated testing.

SKILLS

Languages & Backend: Java, TypeScript, JavaScript, Python, Node.js, REST APIs, JWT, OAuth
Databases: PostgreSQL, Supabase, SQLite (RDBMS); familiar with NoSQL — MongoDB, Cassandra
Frontend: React, Next.js, Tailwind CSS
Testing & DevOps: Playwright, Vitest, Sentry, CI/CD, Git, GitHub, Vercel, Postman, Figma
Product & Systems: Systems Design, SDLC, Requirements Engineering, Agile, API Integration, Database Design

PROJECTS

Possah — Production e-commerce for a live apparel brand — *Next.js · TypeScript · Supabase/Postgres · Playwright* · thepossah.com

- Architected and deployed a production platform — storefront, admin dashboard, payment processing, order management, and fulfillment workflows.
- Integrated Razorpay payment gateway with robust error handling, JWT authentication, and Sentry monitoring; designed PostgreSQL schema for orders, inventory, and users.
- Built automated E2E and unit test suites (Playwright + Vitest) enabling confident production deployments.

Synaptic — Adaptive learning engine that personalizes what you study next — *Next.js · TypeScript · SQLite · JWT* synaptic-adaptive-learning.vercel.app

- Designed an adaptive engine using Bayesian Knowledge Tracing, spaced-repetition scheduling, and prerequisite graph traversal — algorithmic problem-solving applied to a real product.
- Modeled learner progression using relational data structures and knowledge graphs in SQLite; built interactive dependency visualizations with React Flow.

Blueprint Builder — Turns messy client requirements into structured specifications — *Next.js 14 · TypeScript · Supabase/Postgres · Tailwind · Vercel* web-builder-1-six.vercel.app

- Built a requirement discovery system transforming client goals into implementation-ready specs; designed and queried a PostgreSQL schema to store and version structured project data.

Fitness Garage & Zingara — Took two local businesses online — *HTML · CSS · JavaScript* fitness-garage.in · zingararestaurant.co.in

- Designed and launched websites for 2 operating businesses, translating operational requirements into customer-facing digital experiences now serving as their primary online presence.

EXPERIENCE

Operations Team Lead — E-Cell, UVCE, Bengaluru, IN Sep 2023 – May 2025

- Coordinated logistics, execution, outreach, and cross-functional teams for entrepreneurship events; drove 200+ participants to a case competition through structured planning.

Web Design & Content — Greek God Clothing, Bengaluru, IN Jan 2025 – Apr 2025

- Led end-to-end product lifecycle for the brand's first online store — Figma prototyping to live deployment; shaped content calendar around product launches.

Marketing Intern — Jobert Apparels Pvt Ltd, Bengaluru, IN Apr 2025 – Oct 2025

- Developed 3 sub-brand identities from scratch and established the brand's complete customer-facing communication channels.

EDUCATION

University of Visvesvaraya College of Engineering (UVCE) — Bengaluru, Karnataka Expected 2027
B.Tech, Artificial Intelligence & Machine Learning · CGPA 8.9 / 10
Coursework: DSA, Software Engineering, DBMS, OOP, Machine Learning, Computer Networks, Operating Systems

Base PU College — Bengaluru, Karnataka 2021 – 2023
Pre-University (PCMC) · 92%

Jaigopal Garodia Rashtrotthana Vidya Kendra — Bengaluru, Karnataka 2021
Secondary School Certificate (Class X) · 94%
